

MATH MONSTER 2 MATH MAGIC!!

MATH -----!

Math can be made fun and interesting for all----- just like how it is perceived by the few who love math!

Children sometimes get lost in the methodology and do not understand numbers in a meaningful sense. This is something like, working on a 500 piece jigsaw puzzle, where sometimes we get lost in connecting the little pieces to the big picture, and get ourselves frustrated!

Hence, Math seems to be a Monster in the lives of many kids----- irrespective of having Dyscalculia!!

MATH -----!

Math Magic is a Math Remedial Education Program based on Vedic Mathematics. This is the first of its kind in Belgium.

The program aims to establish a steady foundation in the math principles and operations with methods primarily based on Vedic Maths and delivered through Remedial teaching techniques.
